PROACTIVE

TrueProject establishes a quantitative proactive approach to project governance and risk management throughout the project life cycle. TrueProject is a cost-effective "out of the box" solution for your organization that can be easily modified as your needs grow and change.

BEST PRACTICES

Robust project management processes are required to meet the demands of the business. Organizations must deliver solutions more effectively and efficiently than ever before. To do that, they must have insight into mitigating potential risks, a process map for defining and leveraging best practices, and a dashboard for viewing and managing progress.

FLEXIBLE & RELIABLE

TrueProject is a flexible and reliable software solution that lets you leverage historical data and metrics to respond PROACTIVELY to potential problems BEFORE they become unmanageable. TrueProject is not a replacement for detailed task scheduling systems. Rather, it provides the ability to conduct project reviews conveniently and easily.

CRITICAL ANALYSIS

TrueProject user-friendly screens allow you to analyze project risks and respond to potential problems, while multi-level views, dashboards, and reports provide critical information to all levels of the organization.
