12 Minutes

That's all it takes your team to validate any project against industry best practices and reveal hidden problems.

✓ **TrueProject**™
HealthCheck
Point-In-Time Project Assessments

Why risk project failure?

With a one-time,12 minute investment by team members the **TrueProject** HealthCheck lets you experience the predictive power of our enterprise solution.

70%
of projects fail
to meet all their
original objectives*

Predict project problems before they become critical.

Projects give numerous early warning signs of potential trouble. Based on the scientific analysis of thousands of projects,across multiple fields, project success can be predicted in advance by analysis of specific Key Performance Indicators (KPIs).

TrueProject evaluates your project KPIs against a proven compilation of "best practice" methodologies. The process identifies and highlights areas of concern weeks before they become critical. The result? Significant reduction of project risks and increased project success.

TrueProject HealthCheck lets you quickly:

✓ Review up to three projects with no long-term commitment

✓ Assess up to thirty stakeholders per project

✓ Gain results in 7-9 days with a minimal investment of time

✓ Discover what key factors may be limiting your project's success

✓ Learn what project stakeholders really think and how that may impact project success

✓ See how your project conforms to field proven processes and best practices

✓ Get extensive reporting recommending actions to improve your project's likelihood for success

No more surprises.

TrueProject delivers three crucial, research-backed assessments that provide:

✔ ## Actionable Early Warnings
Early Warning Signs assist with providing timely, objective, action-compelling information to avoid project failure. Institutionalizing Early Warning Signs allows organizations to preserve funding by identifying failing projects while they are still developing.

✔ ## Overall Risk Assessment
Risk Assessment efficiently evaluates the status of a project by taking a portfolio-based approach. Utilizing three main project types, Strategic, Key Operational, and Support, allows organizations to assess risks and incorporate better management practices to the project.

✔ ## Pulse Assessment from all Stakeholders
Pulse Assessment helps assure successful delivery through gathering data from all stakeholders that allows for early visibility of potential project problems. It analyzes management, quality control, associated risks, team morale, and underlying capabilities.

Fast, Affordable, Thorough.

TrueProject is a compact solution completed in a matter of days with a minimal time commitment to the participants. It identifies current and potential project problems, their root causes, and level of significance. It visualizes the actual status of a project and highlights the key operational indicators so you can easily recognize where attention is needed to prevent challenged of failed projects. **TrueProject** reveals information you have never seen before — coming from an independent, best-practices engine with specific insight into your project.
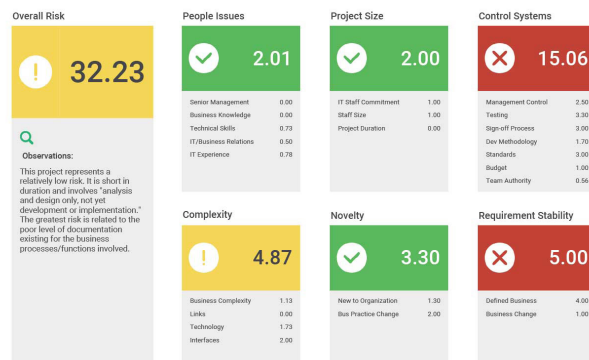

TrueProject HealthCheck
Easy as 1-2-3

1 Select up to three projects you wish to gain insight on
