TrueProject™
Project Success Through Predictive Intelligence

Fact Sheet: TrueProject 2025

AI-Driven Project Intelligence for Smarter Insights and Faster Actions Overview

TrueProject 2025 is the latest evolution in AI-powered project oversight, delivering smarter insights, faster actions, and greater clarity to project leaders. With enhanced predictive analytics, risk detection, and streamlined navigation, TrueProject helps organizations proactively manage risks and ensure successful project execution.

Customer Benefits

- **Faster Decision-Making** – Instantly identifies project risks and priorities for proactive action.

- **Greater Visibility** – Comprehensive project health monitoring with structured KPI insights.

- **AI-Powered Risk Mitigation** – Automated risk detection and trend analysis reduce delays and failures.

- **Higher Project Success Rates** – Early warnings & AI-driven recommendations drive better outcomes.

- **Time Savings** – Eliminates manual oversight, surfacing only the most critical insights.

Technical Capabilities

AI Capabilities:
- Predictive analytics for early risk identification.
- LLM-powered insights enhance decision-making and foresight.
- AI-driven recommendations support governance and project success.

Data Analysis:
- Hierarchical KPI structure for structured insights.
- Forensic drill-down for deeper data investigation.

User Experience Enhancements:
- Optimized UI for intuitive navigation.
- Faster response times and visual clarity improvements.

Deployment & Integration:
- Available as a cloud-based SaaS solution.
- Integrates with project management tools such as Jira, ClickUp, Smartsheet, Monday.com and many others.
- API connectivity for seamless data flow into and from enterprise systems.

Key Features & Enhancements

- ✓ **Actionable Dashboards** – Instantly surfaces critical risks, KPIs, and trends, eliminating manual searches.

- ✓ **Hierarchical KPI Analysis** – Top-down visibility with drill-down insights for executives and project managers.

- ✓ **AI-Powered Insights at Every KPI Level** – Predictive intelligence at Project, Key Factor, and KPI levels for proactive management.

- ✓ **Forensic Drill-Down** – Pinpoint root causes of risks and performance gaps with in-depth data exploration.

- ✓ **Streamlined Navigation** – Faster, intuitive UI ensuring effortless access to risks, trends, and insights.

- ✓ **LLM-Enhanced Decision Support** – Advanced AI delivers sharper risk analysis and governance recommendations.

- ✓ **Optimized User Experience** – Modernized interface with faster response times and enhanced clarity.

> *With TrueProject 2025, we will be significantly reducing time spent searching for risks and increasing our focus on driving project and customer success. The AI-driven insights and streamlined interface will ensure our teams stay ahead of issues before they become roadblocks. It's a game-changer for project leaders and executives.*
