

Identify and fix project problems

(before you know
you have them)

Dramatically improve your success with

TrueProject™

Project failures are costly and entirely too common.

At some point, questions will arise and a determination made if project leadership ignored these warning signs:

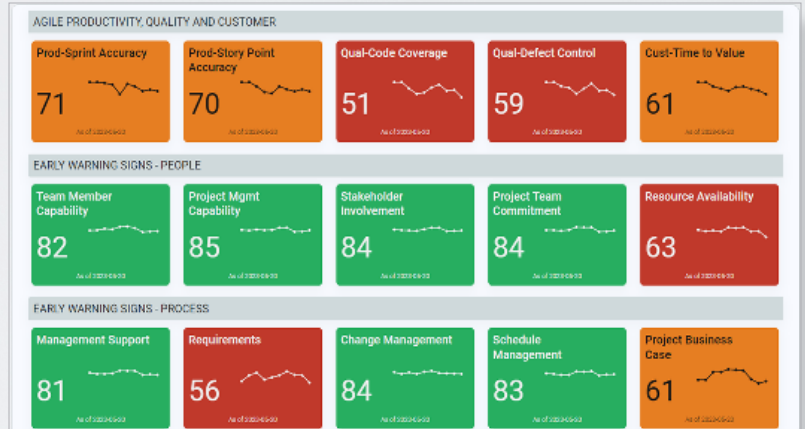

- ✓ Did the project encounter **unreported delays**?
- ✓ Did the teams keep **repeating common mistakes**?
- ✓ Were procedures lax and did they **ignore best practices**?
- ✓ Were there reasons to **doubt the accuracy** of status reports?
- ✓ Did the project suffer from **a wide range of excuses**?

With project complexity increasing, organizations must implement solutions containing impartial, independent verification to help detect problems early and minimize project risks.

These are common problems that are often disguised or concealed under typical project reviews. Managers need an early warning system that can alert them to problems when it is easier, and less expensive, to take corrective actions.

AUTOMATICALLY MONITOR ALL PROJECTS, ALL THE TIME

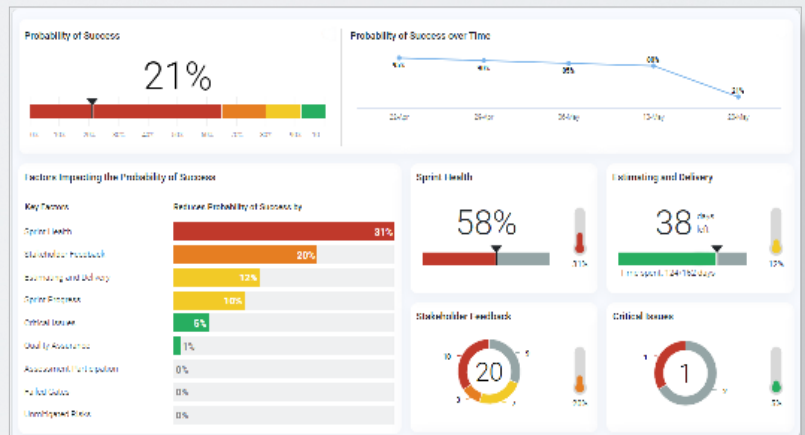

See the health of all projects and the key performance indicators that matter at-a-glance. See your true project status with a numerical score to help identify issues. Gain critical insight into your project portfolio deep down till the sprint progress level. Know exactly which KPIs are risking your project progress and success. Proactively address problems before they become unmanageable.

Leverage the people and project metrics that provide “early warning signs”

BE ALERTED ABOUT THE PROBABILITY OF PROJECT SUCCESS OVER TIME

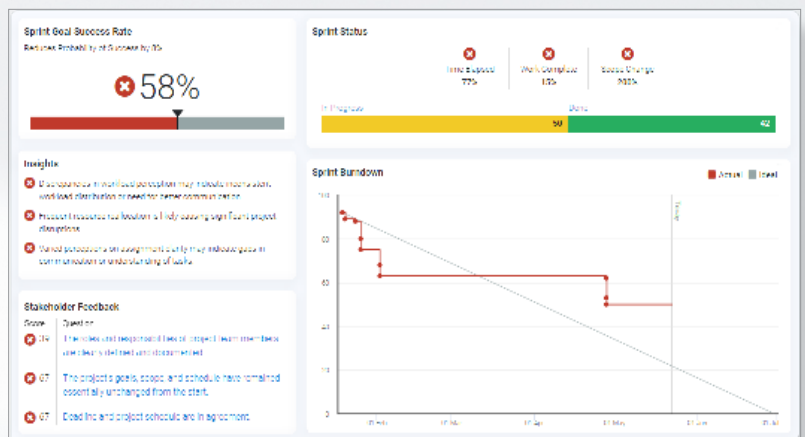

TrueProject’s advanced system not only monitors sprint health but also captures valuable stakeholder feedback, identifies estimation and delivery issues, and calculates the project’s overall probability of success. It’s time to take control and eliminate the fear and uncertainty that plague your projects. Don’t risk failure, stay informed with this ‘expert-in-the-box’ solution and ensure the success of your projects every step of the way.

Stay informed about the probability of your project’s success

GET TRUE PROJECT VISIBILITY WITH AUTOMATED REPORTING

TrueProject’s state-of-the-art system offers real-time updates and detailed insights into your sprint status, enabling you to make informed decisions and stay on track. With comprehensive data on sprint burndown, scope changes, and work completion, you’ll have a complete picture of your project’s progress at your fingertips. No more guessing games or surprises—TrueProject empowers you with the knowledge you need to navigate challenges and proactively address issues.

Lead your team towards project success with accurate, actionable data

Automatically Monitor & Review Every Project.

TrueProject monitors all projects, all the time for you. Review your KPIs and proactively address potential problems before they become unmanageable. The result? Project success!

- ✓ Leverage your historical data and metrics to conduct continuous project reviews.
- ✓ Compare your project to internal and industry benchmarks.
- ✓ Prepare status evaluations conveniently and easily using data you already collect.
- ✓ View project health and status at-a-glance.
- ✓ Implement effective project control and governance.

TrueProject is a flexible and reliable software solution that lets you leverage historical data and metrics to respond PROACTIVELY to potential problems BEFORE they become unmanageable.

TrueProject is not a replacement for Microsoft® Project or another detailed scheduling system. Rather, it provides the ability to conduct repetitive project reviews conveniently and easily.

TrueProject user-friendly screens allow you to analyze project risks and respond to potential problems while multi-level views, dashboards, and reports provide critical information to all levels of the organization.

TrueProject establishes a proactive and quantitative approach to project governance and risk management throughout the project lifecycle. TrueProject is a cost effective "out of the box" solution for your organization that can be easily modified as your needs grow and change.

Strong project management processes are required to meet the demands of the business. Organizations must deliver solutions in a more effective and efficient manner than ever before.

To do that, they must be able to have insight into mitigating potential risks, a process map for defining and leveraging best practices, and a dashboard for viewing and managing progress.

[With TrueProject] “we have a better understanding of what is really going on.”

Teresa Reilly
Executive Project Director
Georgia Technology Authority

“The promise that I saw with TrueProject was that it cuts through the clutter and gives you advance warning on the health of the project, the team, and any hidden impediments.”

Bala Varadarajan
Chief Operating Officer
Systech Solutions

“There is nothing out there like this. It was obviously developed by someone who understands how a PMO works.”

Capers Jones
Author and Chief Scientist Emeritus
of Software Productivity Research, Inc. (SPR)

“This kind of solution can accurately predict project problems and their underlying issues through KPI-based root cause analysis. This is a major leap forward from traditional task management.”

R Ray Wang
Principal Analyst & Founder
Constellation Research, Inc.

“TrueProject is a critical component to reducing risk for our clients and driving the outcomes to a higher level of completeness. It is really a critical part of how we deliver and how we communicate to our clients they can trust us to achieve the results that they are looking for”.

Tim Harris
Chief Strategy Officer
Argano

“Now organizations can save money...and projects... by monitoring the factors that are the Early Warning Signs of project problems.”

Dr. Robert Charette
International Risk Management Expert
President, ITABHI Corporation

“To effectively manage the performance of projects and project portfolios, the ability to predict project health to guide teams to increased success is critical. This ability can ensure that project personnel act and perform as necessary for success rather than respond to project issues. TrueProject has addressed the opportunity to manage projects with the focus on performance and outcomes, to provide predictive insights to gain the knowledge of the true health of your projects.”

Mark Smith
CEO and Chief Research Officer
Ventana Research

“TrueProject, coupled with project assurance, in Georgia alone, have saved taxpayers an estimated \$280 million annually that would have been lost to failed or challenged technology projects.”
